DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a system.
- II. Claims 7-22, drawn to a method for forming a miniarray.
- III. Claims 23-36, drawn to a method of diagnosing.
- IV. Claims 37-54, drawn to a method of diagnosing.

The inventions are distinct, each from the other because of the following reasons:

Inventions II-III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to different methods with different modes of operation requiring different reagents, starting materials and/or conditions.

Inventions I and II-IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced

Art Unit: 1639

by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by hand.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for Group I is not required for Groups II-IV, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

- A. Dispenser tips (claims 4, 11) i.e., disposable or fixed.
- B. Electromechanical force (claim 13)
- C. Substrate (claim 18)
- D. Reagent (claim 19)
- E. Analyte sample (claim 20)
- F. Label (claim 22)
- G. Disease condition (claim 24 or 50)
- H. Genes in control sample (claim 27)
- I. Target sample (claim 28), if protein is elected, the specific protein.

Art Unit: 1639

J. Image (claim 30 or 51) or by computer means (claim 36), if shape or symbol is elected, further elect the specific shape or symbol recited in claim 32 or 53; or shape with specific part of the body as recited in claim 33 or 54.

K. Binding elements (claim 46 or 49) and matching element, if hapten is elected, elect the specific group recited in claim 47 or fluorescent dye of claim 48.

Each of the species recited in subgroups A-K differs in structure, modes of operation. Each species requires different patentability determination under the different statutes. A prior art reference anticipating one species would not render obvious the other species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 23 and 37 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1639

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
